Hello, I'm a fresh Full Stack Web Developer that's trying to change from my career in Video production. I hope my over 8 years of experience in Video production with help with the creative side of web development. I've earned a certificate in Full Stack Web Development from the University of Central Florida. While working at the golf channel for nearly 7 years I was the throw to the fire guy. Whenever we wanted to try to do something new I was usually always involved in some capacity. My experience Producing/Directing shows has gave me abilities to lead teams and better scope out my own projects. I thrive under pressure and high stress situations, and love to solve problems of whatever kind is thrown at me.
